PACKAGING MACHINES

Biscuit Wrapping Line

FP 100 E

Fully automatic line capable of packaging, with primary flow pack and secondary robotised packaging, up to 72,000 biscuits / hour.

The new horizontal flow pack **FP100 E machine**, the result of decades of technological advancements made day after day by **Tecno Pack SpA**, is integrated in this plant.

Secondary Robotised Packaging Line

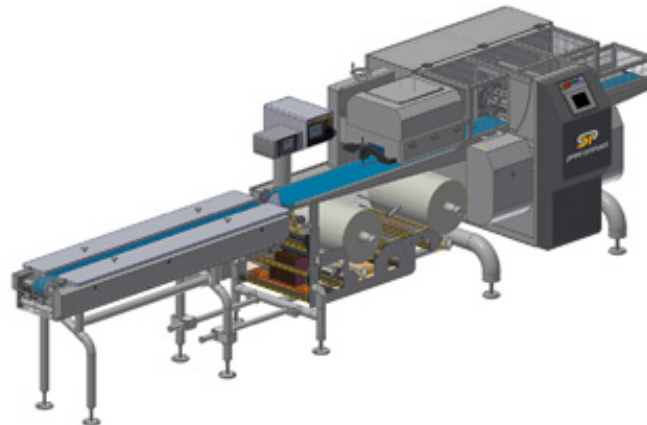

GSP 65 EVO - MAP (modified atmosphere)
Tray Wrapping and further Shrink-Wrapping

This machine is dedicated to packaging food products on controlled atmosphere trays followed by heat shrinking to obtain an excellent appearance and shelf life.

GSP 55 EVO - MAP (modified atmosphere)
Cheese Wrapping System

This machine has been specifically designed for packaging small and medium-sized cheese blocks in modified atmosphere, and is ready for installation and to work in hostile environments.

GSP 50 EVO
Flow-Wrapper dedicated to bread industry

This electronic horizontal flow pack machine has an excellent cost-quality-performance ratio; the optimal solution for medium-sized and artisanal businesses, for example, in the bread-making industry

DIAMOND 650 Box Motion + HSC 80 Box Motion

Automatic Packaging Line for Industrial Paper Rolls AFH

Automatic line for high speed packaging of AFH industrial paper rolls in heat shrink film based on the electronic continuous horizontal packaging machine model DIAMOND BOX MOTION is sure to make visitors appreciate the hi-tech solutions dedicated the industrial tissue sector.

FV 210 + TWIN T 75

Vertical Bagging Line and further Shrink-Wrapping

Automatic shrinkwrapping machine TWINT 75 N90 to be integrated into the vertical system FV 210. Its task is to automatically bundle the vertical bags and wrap them in heat-shrink film to obtain the so-called secondary packaging.

Your machine's documents everywhere and anytime

TecnoScan is a special app focused on Customer Support Management. This app is directly connected to our Enterprise Resource Planning. It means that while you are using our app to check information about your machine, you are browsing directly inside our company's documents.

TecnoScan provides 3 very important advantages:

A CUSTOMER SERVICE CONNECTION

You have access to all documents relating to your machine, so you can be independent from our technical department and resolve urgent repairs on your own.

PACKAGING SYSTEMS TRANSPARENCY

If something goes wrong we want to provide clear, immediate assistance.

It's a guarantee that we are a reliable support for you now and in the future, through the lifetime of the machine.

UP-TO-DATE DOCUMENTATION

You never lose the information about the machine. In fact, you have access to the most current manuals, electrical drawings, diagrams and spare parts list.

TecnoScan allows us to keep our promise: TO BE UPDATED AND AVAILABLE FOR OUR CUSTOMERS 24/7
